MOTOR MOVER

A black and white photograph of a man in a safety vest operating a yellow motor mover in a factory. The mover is a compact, motorized unit with a handle and a hitch. The man is standing to the right of the mover, holding the handle. The background shows a factory floor with various equipment and structures.

**ELECTRIC PULL AND
PUSH TUGS FOR EASY
MATERIAL HANDLING**

MOTOR MOVERS are ergonomic electric tugs that are a highly effective and efficient solution to your material handling needs.

Whether moving loads over distance or operating in confined spaces, Motor Movers provide assisted manoeuvrability.

Motor Movers combine our tried and tested technology with ergonomic design. Powered by high performance batteries, which are fast charged, the Motor Mover is designed to operate at optimum performance levels throughout the working day.

**Designed and
manufactured
in the UK,
Motor Movers are
dispatched from
our East Midlands
base and come
with a 12-month
warranty.**

Offering considerably more than an 'off the shelf' product line, we work with each customer to provide them with the best solutions possible. Our in house design and manufacturing team, can provide couplings and hitches engineered to allow the use of existing trailers, trolleys, cages and jigs with your Motor Mover. We can also manufacture to order new trailers, trolleys, cages and jigs that connect effortlessly with your Motor Mover.

All Motor Mover products are manufactured and built to ISO: 9001:2015 and ISO: 14001:2015 quality standards.

THE MAJOR

MOTOR MOVER: THE MAJOR

The MAJOR is our top of the range mover, able to make light work of the heaviest loads, right up to **20,000 kg**

The MAJOR comes as standard with the following features:

- A hydraulic or manual weight transfer mechanism to easily hitch and unhitch wheeled loads
- Intuitive user interface
- Highly efficient powerful electric motor
- 24V high performance battery with fast charge
- Variable speed controllers: forward and reverse.
- Safety Auto-reverse shut off
- Electromagnetic parking brake
- Puncture proof, non-marking wheels
- Self-diagnostic electrical test system
- A standard coupling
- 12 months manufacturers warranty

Optional items that can be included:

- Machine manufactured in stainless steel (304 & 316)
- Bespoke couplings
- Trolleys, jigs and cages
- Diagnostic programmer

THE MAXI

MOTOR MOVER: THE MAXI

The MAXI is our mid-size mover that retains the manoeuvrability of the MINI, but adds increased load capacity with the power to **move up to 10,000 kg.**

Designed to be a 'work horse' for your business, the MAXI is engineered for endurance.

The MAXI comes as standard with the following features:

- A hydraulic of manual weight transfer mechanism to easily hitch and unhitch wheeled loads
- Intuitive user interface
- Highly efficient powerful electric motor
- 24V high performance battery with fast charge
- Variable speed controllers: forward and reverse.
- Safety Auto-reverse shut off
- Electromagnetic parking brake
- Puncture proof, non-marking wheels
- Self-diagnostic electrical test system
- A standard coupling
- 12 months manufacturers warranty

Optional items that can be included:

- Machine manufactured in stainless steel (304 & 316)
- Bespoke couplings
- Trolleys, jigs and cages
- Diagnostic programmer

THE MINI

MOTOR MOVER: THE MINI

The MINI is designed to perform where space is a premium and makes other handling options impractical and **can handle loads up to 3,000 kg.**

The MINI comes as standard with the following features:

- A Semi-automatic or manual weight transfer mechanism to easily hitch and unhitch wheeled loads
- Intuitive user interface
- Highly efficient powerful electric motor
- 24V high performance battery with fast charge
- Variable speed controllers: forward and reverse
- Safety Auto-reverse shut off
- Electromagnetic parking brake
- Puncture proof, non-marking wheels
- Self-diagnostic electrical test system
- A standard coupling
- 12 months manufacturers warranty

Optional items that can be included:

- Machine manufactured in stainless steel (304 & 316)
- Bespoke couplings
- Trolleys, jigs and cages
- Diagnostic programmer

HYDRAULIC COUPLING SYSTEMS & TRANSPORT SYSTEMS

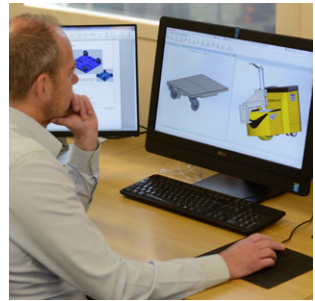

Getting the most out of your Motor Mover.

We have in-house project management and design teams who work closely with you to understand your exact material handling requirements and provide tailored solutions on time and to budget.

All our Motor Mover machines come with a standard heavy duty coupling and the option of a bespoke heavy duty coupling to enable your Motor Mover to connect effortlessly with your existing transport systems such as trailers, trolleys, cages and jigs.

As well as bespoke heavy duty couplings, we design and manufacture to order bespoke transport systems such as trailers, trolleys, cages and jigs to enable you to get the most out of your Motor Mover and your investment.

in-house project
management

SERVICING/AFTERCARE:

Routine servicing is essential to safeguard the performance of your Motor Mover and as the manufacturer of your Motor Mover, we are best placed to ensure the equipment we have supplied is always maintained to the highest standard.

We offer two types of Servicing and Repair Packages which have been designed to ensure the safety of the equipment, minimise operational downtime and maximise performance.

Servicing and Repair Packages include UK travel and associated labour but excludes any part or labour for additional repairs.

	Standard	Premium
Scheduled maintenance visits per year	1	1
Emergency call out response time	72 hrs	24 hrs
Parts & labour discount	5%	10%
Annual service charge	£349	£499

FIXED TERM SERVICE PACKAGES

Take advantage of a fixed term service package so you can rest assured that your Motor Mover will be maintained and regularly serviced. This can be applied to new Motor Movers or machines currently owned. We offer servicing contracts for up to 5 years, with significant cost savings.

FIXED TERM CONTRACT HIRE:

We recognise that some customers will prefer not to incur the capital outlay for a new machine.

With that in mind, we are able to offer customers the option of hiring a Motor Mover to avoid the up front cost. It couldn't be easier to hire simply :

1. Choose the model of Motor Mover that you wish to hire.
2. Choose the hire period that's right for you based on 36, 48 or 60 months.
3. Select a maintenance and service package to go with your Motor Mover.

Then, we can calculate your initial payment and fixed monthly rental as well as dates for delivery.

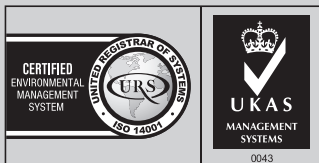

All our machines come with operator training which we provide onsite when delivering the Motor Mover to you.

At the end of the rental agreement, simply get in contact to return the Motor Mover to us and ask one of our agents about a new Motor Mover hire agreement where you can expect to benefit as a loyal customer on pricing across the range of Motor Movers.
