

Lifelines

TRAVSMART LIFELINE

The Travsmart lifeline complies with the requirements of the EN 795 C standard and can be used simultaneously by 5 users. The intermediate supports must be located at 15 metres. The Travsmart lifeline can be installed under a ceiling, on a wall, on an inclined surface up to 5°, on the ground or on a post.

The Travsmart lifeline advantages :

MEETS THE USER'S NEEDS:

- Choices of installations and uses (ergonomics).
- Passing through the intermediate supports with no manual intervention by the user.
- The user can work on either side of the lifeline without the need to disconnect (improved safety).

MEETS THE INSTALLER'S NEEDS:

- No special tools are required to install the lifeline.
- The risk of the cable clamp nuts coming loose over time is fully eliminated.
- Quick and easy installation of the lifeline cable.
- In the event of a fall, there is no need to fully dismantle the lifeline. Simply loosen the cable to remove and reinstall the failed intermediate supports (installation time reduced).
